Chemistry and Physics of Lipids
86 (1997) 193–194

CPL
CHEMISTRY AND
PHYSICS OF LIPIDS

Volume contents

Volume 86 (1997)

S.G. Batrakov, O.N. Tolkachev (Russia) *The structures of triacylglycerols from sclerotia of the rye ergot Claviceps purpurea (Fries) Tul.* 1
D.A. Jaeger, P.A. Goodson, N. Arulsamy, B. Li (USA) *Solid-state structure of 2-hydrazino-N-dodecyl (tetradecyl)-N,N-dimethyl-2-oxoethanaminium bromide* 13
L. Clary, G. Verderone, C. Santaella, Pierre Vierling, P. Chang (France) *Polymorphic phase behavior of fluorocarbon double-chain phosphocholines derived from diaminopropanol, serine and ethanolamine and long-term shelf stability of their liposomes.* 21
B. Albrecht, G. Pohlentz, K. Sandhoff, G. Schwarzmann (Germany) *Synthesis and mass spectrometric characterization of digoxigenin and biotin labeled ganglioside GM1 and their uptake by and metabolism in cultured cells* 37
R. Hutterer, F.W. Schneider, M. Hof (Germany, Czech Republic) *Anisotropy and lifetime profiles for n-anthroyloxy fatty acids: a fluorescence method for the detection of bilayer interdigitation* 51
V. Natarajan, S. Vepa, M. Al-Hassani, W.M. Scribner (USA) *The enhancement by wortmannin of protein kinase C-dependent activation of phospholipase D in vascular endothelial cells* 65
A. Tokumura, T. Tsutsumi, Y. Nishioka, H. Tsukatani (Japan) *Exogenously added alkylmethylglycerophosphocholine and alkylmethylcarbamylglycerophosphocholine accumulate in plasma membranes more than in intracellular membranes of rabbit platelets* 75
T. Koga, I. Takahashi, R. Yamauchi, M. Piskula, J. Terao (Japan) *Kinetic studies on the formation of phosphatidylcholine hydroperoxides in large unilamellar vesicles by azo compounds* 85

A.U. Siddiqui, S. Swaminathan, X. Su, W.K. Wilson, G.J. Schroepfer, Jr. (USA) *Inhibitors of sterol synthesis. Synthesis and spectral properties of 3β-hydroxy-25,26,26,26,27,27,27-heptafluoro-5α-cholestan-15-one* 95
D.E. Epps, C.L. Wilson, A.F. Vosters, F.J. Kézdy (USA) *The pretransition of dipalmitoyllecithin bilayers as probed by the fluorescent pyrrolopyrimidine, U-104067* 121
D.W. Pack, F.H. Arnold (USA) *Langmuir monolayer characterization of metal chelating lipids for protein targeting to membranes* 135
M. Käsbauer, D.D. Lasic, M. Winterhalter (Germany, USA, Switzerland) *Polymer induced fusion and leakage of small unilamellar phospholipid vesicles: effect of surface grafted polyethylene-glycol in the presence of free PEG* 153
Z. Huang, R.M. Epand (Canada) *Study of the phase behaviour of fully hydrated saturated diacyl phosphatidylserine/fatty acid mixtures with ^{31}P-NMR and calorimetry* 161
S. Lin, R.I. Duclos, Jr., A. Makriyannis (USA) *Syntheses of 1,2-di-O-palmitoyl-sn-glycero-3-phosphocholine (DPPC) and analogs with ^{13}C- and ^{2}H-labeled choline head groups* 171
